MaleCNS BM excess persists in 1,000 side/count-matched FAFB subsets
A
Threshold ≥ 3
Subset count
Non-self directed density
MaleCNS BM
Subset q99
B
Threshold ≥ 3
Subset count
Reciprocal directed fraction
C
Threshold ≥ 5
Subset count
Non-self directed density
D
Threshold ≥ 5
Subset count
Reciprocal directed fraction
Sensitivity draws are correlated subsets, not independent biological replicates.
